The exact stock price and effective dates may not be set forth on the table, in which case, if the stock price is:

- between two stock price amounts on the table or the effective date is between two dates on the table, the number of additional shares will be determined by straight-line interpolation between the number of additional shares set forth for the higher and lower stock price amounts and the two dates, as applicable, based on a 360-day year;
- in excess of \$10.50 per share (subject to adjustment), no additional shares will be issued upon conversion; and
- less than \$6.91 per share (subject to adjustment), no additional shares will be issued upon conversion.

Notwithstanding the foregoing, in no event will the total number of shares of common stock issuable upon conversion, exceed 144.7178 per \$1,000 principal amount of the Notes, subject to the same adjustments as the conversion rate as set forth under “Description of the Notes-Conversion Rate Adjustments” in the Preliminary Prospectus.

Use of Proceeds:

The Company estimates that the net proceeds it receives from this offering will be approximately \$169,250,000 (or \$194,712,500 if the underwriters exercise their over-allotment option in full), after deducting the fees and estimated offering expenses payable by the Company of \$500,000.

The Company expects to use a portion of the net proceeds from the sale of the Notes to repurchase from time to time a portion of the Company’s 4.75% Senior Convertible Notes due 2020. The Company intends to use the remainder of the net proceeds from the offering to repay debt under its existing credit facility and to invest in high quality short term debt investments, and/or to make long term investments in accordance with its investment objective.
